7/28/85

Dear Henry,

Penn Jones, Jr., Midlothian, Texas, can or could supply an 8mm version of the Zapruder film for about $10. Send him with it a copy of the story emphasizing your youth and do not mention my name. He thinks I'm a CIA agent of some kind because I have opposed some of the utterly irrational things he and others have done. He is a fine human being who has just gone bananas on this, not uncommon. His work is not dependable and often is irrational. If he does not have the film he should be able to tell you how to get it. Just tell him you heard he has copies and you would like to buy one. He used to have both Nix and Muchmore and if I'm not mistaken, had them all on one reel.

My own copy is not suitable for copying.

Generally speaking I am willing to take time to be of help to others. Right now my ability will depend on when. I'm trying to finish up a book, I have an enormous amount of overhead work, like answering letters and mailing books, and I'm tied up in two court appeals. So all I can do is express a willingness. You may pick a time when it is impossible. So, call first: 301/473-8186.

While I'm writing let me tell you how to get here.

It depends on where you start. Generally Exit 16 of the Beltway is best. If you are in South Baltimore take the Beltway to it. If you are west of the Beltway, take US 40 West. They all become one.

If you start at Exit 16 you'll come into ~~I&~~ I70. It will merege into 40. The numbers change but when it remains 40 before Frederick, thereafter stay off of the new beginning of I70 at Frederick. 40 joins US15N at Frederick and leave it at Exit 6W. Before you get to this exit you'll see a Holiday Inn. You go to it and at it turn right on Baughman's Lane for about 1/2 mile. There, at a 4-way stop turn left onto Shookstown Road for about 2 miles. After you start going up the mountain, the first road on the right is Old Receiver Road. Turn right on it for about .3 miles and we are in a patch of woods there. On Old Receiver there is a poorly-marked fork. Stay to the left at it. You'll begin a short steep downhill S curve right after the fork. The patch of woods on the right after that is ours. When you are down in the flat after this curve you'll see a large mailbox with a white Washington Post box on the top. About 2 carlengths past that, on the right, is our lane. Drive in.

Best regards,
